2022

FJARSKIFTISHAGTØL
TELECOM STATISTICS

2. útgáva, dagførd tann 4. apríl 2025
2nd Edition, updated on 04 April 2025

Formæli

Fjarskiftiseftirlitið kunnger fjarskiftishagtøl tvær ferðir um árið.

Endamálið er at geva lesaranum innlit í seinastu gongdina á føroyska fjarskiftismarknaðinum. Talan er um lýsing av gongdini í høldum og tilhoyrandi ferðslu á hesum lyklaøkjum: fastnettelefonnet, fartelefonnet, breiðbandi og sjónvarpi.

Henda frágreiðingin er grundað á upplýsingar, sum Fjarskiftiseftirlitið hevur savnað frá veitarum á føroyska fjarskiftismarknaðunum. Veitararnir, sum eru fevndir av hagtølunum, eru: Føroya Tele, Nema, Canal Digital, Elektron, Glotti og Tosa.

Tosa er í 2022 uppgjørt sum trotabúgv. Tað hevur ikki verið møguligt at savna hagtøl frá Tosa fyri seinna árshelming 2021. Tí kann ferðslan frá Tosa ikki verða borin saman við hinar veitararnar. Tosa byrjaði virksemi sína 3. desember 2020 sum fyrsti tykisveitari (MVNO) í Føroyum við tænastum fyrst og fremst til privatmarknaðin.

Í 2021 var Glotti lagdur aftur at útgávuni. Glotti byrjaði aftur í 2021 eftir 4 ár í dvala. Glotti veitir privatkundum í parti av Eysturoynni fast breiðband um kaðal, ljósleiðara og FWA[1].

Ábendingarnar í hesi útgávuni eru gjørdar upp í samsvari við mát Altjóða fjarskiftissambandsins[2].

Skálatrøð, 4. apríl 2025

Fjarskiftiseftirlitið

2. útgáva: Í hesi útgávu eru rættingar í flestum talvum og rásmyndum vegna villur í innanhýsisuppgerð Fjarskiftiseftirlitsins. Rættingarnar fevna um allar talvur og rásmyndir, sum hava tøl frá Føroya Tele. Í flestum førum er munurin minni enn trý prosent. Hetta rakar bara hesa útgávuna, sum er fyri árið 2022.

[1] Terrestriskt, fast, tráðleyst breiðband.
[2] International Telecommunication Union, ITU.

Preface

The Telecommunication Authority publishes telecommunication statistics twice a year.

The purpose of this publication is to give the reader insight into the latest developments in the Faroese telecommunication market. This publication presents the developments of subscriptions and associated traffic within the following key areas: Fixed-telephone networks, mobile-cellular networks, broadband, and television broadcasting.

This publication is based on information collected by the Telecommunication Authority, an independent Government agency, from the operators on the Faroese telecommunication markets. The operators included in the statistics are: Føroya Tele (Faroese Telecom), Nema (previously called Hey / Vodafone), Canal Digital, Elektron, Glotti, and Tosa.

Tosa declared bankruptcy in 2022. It has therefore not been possible to gather statistics from Tosa for the 2nd half of 2021. Data consumption reported from Tosa for 2021 cannot be compared to the other operators, since the consumption is only reported for the first half of 2021. Tosa launched in December 2020 as the first virtual operator (MVNO) on the Faroes market with products aimed at private consumers.

In 2021, Glotti was added to the statistics. Glotti resurfaced in 2021 after 4 years in dormancy. Glotti provides fixed-broadband over cable, fibre and FWA[3] to private consumers in parts of Eysturoy.

Indicators in this publication are in accordance with the standards of the International Telecommunication Union (ITU).

Please note that this document uses Continental European formatting for numbers: commas (,) as decimal points and periods (.) as thousands separators, except in the ***Highlights*** *section.*

Skálatrøð, 04 apríl 2025

The Telecommunications Authority of the Faroe Islands

2nd Edition: This edition features revisions to most tables and figures to rectify errors originating from the Authority's internal processing. The corrected data impacts all tables and figures that include numbers provided by Føroya Tele. In the majority of cases, these errors were within a 3 percent margin. This affects only this publication which is for the year 2022.

[3] Terrestrial fixed wireless broadband.

Innihaldsyvirlit / Table of Contents

Aðaltættir

Fastnet
14.151 haldaralinjur (-6,71%),
av teimum vóru 3.977 VoIP-høld (+6,99%) og
664 vóru ISDN-javngildar talurásir (-28,29%).

Fartelefonsamskifti
62.311 fartelefonhøld (+4,16%),
av teimum vóru 43.341 goldin frammanundan (+8,49%).
8.280 M2M-fartelefonhøld (+38,37%).

Alnet
18.903 føst breiðbandshøld (+1,75%),
av teimum vóru 17.486 DSL-høld (-2,11%).
61.867 fartelefonbreiðbandshøld (+4,67%).

Ferðsla
44,10 tímar av útgangandi fartelefonferðslu hvørt haldið (-14,73%).
9,70 PB[4] av fartelefonbreiðbandsferðslu innanlands (+25,57%).
163,59 GB[5] av fartelefonbreiðbandsferðslu hvørt haldið (+22,26%).

Sjónvarp
11.650 sjónvarpshøld við mongum rásum (-3,15%),
av teimum vóru 1.678 fylgisveinaantennuhøld beinleiðis til heimið (-7,29%).

---

[4] 1 PB (petabýt) = 1.000.000 GB (gigabýt).
[5] MB eru umroknað til GB við at býta tal á MB við 1.000.

Highlights

Fixed-telephone networks

14,151 subscriptions (-6.71%),
of which 3,977 were VoIP subscriptions (+6.99%), and
664 were ISDN voice-channel equivalents (-28.29%).

Mobile-cellular networks

62,311 subscriptions (+4.16%),
of which 43,341 were prepaid subscriptions (+8.49%).
8,280 M2M mobile-network subscriptions (+38.37%).

Internet

18,903 fixed broadband subscriptions (+1.75%),
of which 17,486 were DSL subscriptions (-2.11%).
61,867 active mobile-broadband subscriptions (+4.67%).

Traffic

44.10 hours outgoing mobile traffic per subscription (-14.73%).
9.70 PB[6] domestic mobile-broadband internet traffic (+25.57%).
163.59 GB[7] mobile-broadband traffic per subscription (+22.26%).

Broadcasting

11,650 multichannel TV subscriptions (-3.15%),
of which 1,678 were DTH satellite subscriptions (-7.29%).

---

[6] 1 PB (petabyte) = 1,000,000 GB (gigabyte).
[7] MB are converted to GB by dividing the number of MBs by 1,000.

[8] At eitt nummar er flutt merkir, at viðskiftin hevur skift veitara og tí hevur flutt sítt nummar frá einum veitara til ein annan.

[9] To port a number signifies that a customer has switched service provider, transferring the number from one provider to another.

[10] Við tað at vit bert hava ein veitara av fastneti, verða fastnetnummur í Føroyum flutt millum veitararnar við at broyta veitaraforval. Broytingar í veitaraforvali koma fyri, tá ið viðskiftar skifta veitara, tá ið ein viðskifti stovnar hald og samstundis velur veitaraforval, og tá ið viðskifti, sum hevur veitaraforval, strikar haldið. Tað hevur ikki verið møguligt at gera flutningarnar upp serstakliga, og tí vísir talið fleiri flutningar enn rætt er.

Tað skal viðmerkjast, at flutningur av nummarblokkum er íroknaður. Tískil fevna hagtølini eisini um nummur, sum í løtuni ikki eru í nýtslu.

[11] Since there is only one provider of the physical fixed network, fixed numbers are ported by changing the carrier pre-selection prefix. However, it has not been possible to screen out transferred numbers only. Hence, this figure contains transferred numbers as well as new or terminated numbers.

It should be noted, that ported number blocks are included. Therefore, the figure also includes numbers not in use at the moment.
