FJARSKIFTISHAGTØL
TELECOM STATISTICS

Kunngjørd tann 10. september 2018
Published on 10 September 2018

Formæli

Fjarskiftiseftirlitið kunngerð eina fjarskiftisfrágreiðing tvær ferðir um árið.

Endamálið er at geva lesaranum innlit í seinastu gongdina á føroyska fjarskiftismarknaðinum. Talan er um lýsing av gongdini í haldum og tilhoyrandi ferðslu innan hesi lyklaøkir: fastenettelefoni, fartelefoni, breiðband og sjónvarp.

Hendan frágreiðingin er grundað á upplýsingar, sum Fjarskiftiseftirlitið hevur savnað frá veitarum á føroyska fjarskiftismarknaðunum. Veitararnir, sum eru fevndir av hagtølunum, eru: Føroya Tele, Hey (fyrr Vodafone), Canal Digital, Elektron og Nótin.

Indikatorarnir í hesi útgávuni eru í samsvari við standardir hjá altjóða fjarskiftissambandinum: "International Telecommunication Union" (ITU).

Samanborið við eldri útgávur, hava vit broytt indikatorin "Sjónvarpshald við fleiri rásum" (ITU 77 i965m), ið er nýttur í talvu 41, soleiðis:

- Frá 2017 eru Canal Digital hald til antennufeløg íroknað í fráboðanini frá Canal Digital. Antennufeløg vóru ikki íroknað árini frammanundan. Hald til antennufeløg hjá Canal Digital taldu 1.062 hald ultimo 2017.

Aðramáta er uppgerðarhátturin óbroyttur.

Tillagingar og rættingar framdar í 2015 og 2016, eru at finna í frágreiðingunum fyri tey árini.

Skálatrøð, 10. september 2018

Fjarskiftiseftirlitið

Preface

The Telecommunication Authority publishes a telecommunication report twice a year.

The purpose of this publication is to give the reader an insight into the latest development on the Faroese telecommunication market. The report presents the developments of subscriptions and associated traffic within the key areas: Fixed-telephone networks, mobile-cellular networks, broadband and television broadcasting.

The report is based on information collected by the Telecommunication Authority, an independent Government agency, from the operators on the Faroese telecommunication markets. The operators included in the statistics are: Føroya Tele (Faroese Telecom), Hey (previously called Vodafone), Canal Digital, Elektron and Nótin.

Indicators in this publication are in accordance with the standards of the International Telecommunication Union (ITU).

Compared to older publications, we have modified the indicator "Multichannel TV subscriptions" (ITU 77 i965m) used in table 41, in the following way:

- From 2017, subscriptions by home associations were included in the statement from Canal Digital. This was not the case the years prior to 2017. Subscriptions by home associations at Canal Digital counted 1,062 subscriptions at the end of 2017.

Otherwise, the definitions are unchanged.

Modifications and corrections, made in 2015 and 2016, have been stated in the previous reports.

Skálatrøð, 10 September 2018

The Telecommunications Authority of the Faroe Islands

Table of Contents

Høvuðspunkt[1]

Fastnet

18.021 haldaralinjur (-5,27%)

Av teimum vórðu 2.242 VoIP hald (+12,90%) og 2.026 vórðu ISDN javngildar talurásir (-13,12%)

Fartelefoni

56.293 fartelefonhald (+2,85%)

Av teimum vórðu 26.606 eftirgoldin fartelefonhald (+2,26%)

3.149 M2M fartelefoni hald (+20,10%)

Internet

18.041 føst breiðbandshald (+0,70%)

Av teimum vórðu 17.844 DSL internethald (+0,72%)

45.009 fartelefoni breiðbandshald (+5,99)

Ferðsla

16.807.100 min. útgangandi uttanlandsferðsla við fartelefon (+17,95%)

14.175.220 min. VoIP ferðsla (+22,18%)

2.167.897.670 MB fartelefoni breiðbandsferðsla, innanlands (+661,95%)

Sjóvnvarp

13.017 sjónvarpshald við fleiri rásum

Av teimum vórðu 3.513 "beinleiðis til heimið" fylgisveina antennuhald

[1] Prosentbroytingin vóru roknað í mun til somu tíð ella sama tíðarskeið, tvey ár frammanundan. Tal av haldum vóru uppgjørt við árslok. Ferðsla vóru roknað fyri alt árið.

Samandráttur

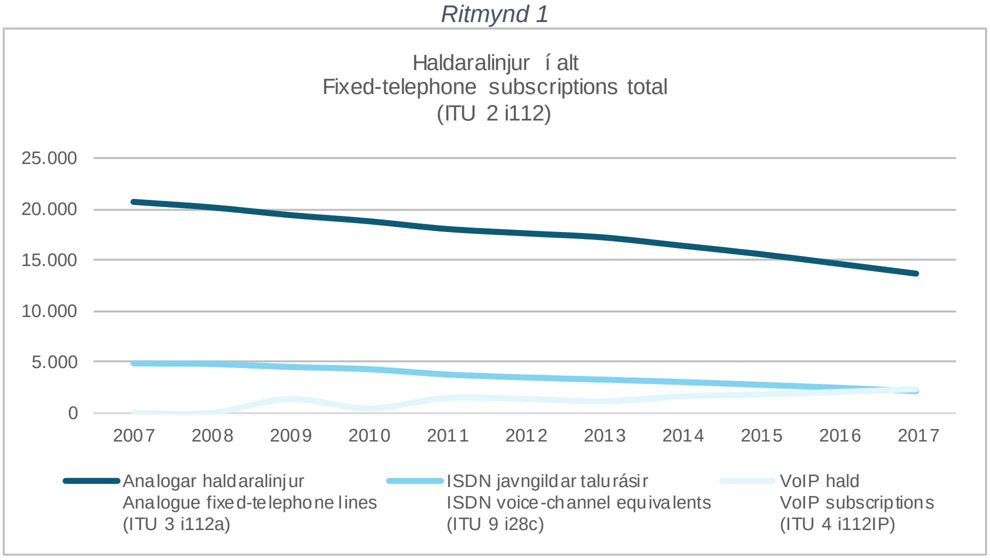
Fastnet

Tað vóru 18.000 fastnet hald við ársenda 2017. Hetta er ein minking uppá 2.000 hald samanborið við endan av 2015. Vanlig fastnet hald (analog og ISDN) hildu fram at minka, ímeðan talið av VoIP haldum hevur verið vaksandi.

Hóast vanlig analog telefonhald taldu 92% av minkingini, var henda tøknin framvegis tann mest vanliga á Føroyska fastnet marknaðinum. Við endan av 2017 vóru 76% av fastnet haldunum analogar linjur.

VoIP taldi 2.200 hald við ársenda 2017, sum er nærum 500 fleiri hald enn við ársenda 2015. Við ársenda 2017 taldi VoIP 12% av øllum fastnet haldunum, samanborið við 9% við endan av 2015. VoIP fevndi mestsum einans um vinnulig hald, 98% av VoIP haldunum vóru vinnulig við endan av 2017.

Ritmynd 1



Hóast stóru minkingina, hevur talan ikki verið um nakra stóra broyting av marknaðarpørtunum í tíðarskeiðinum. Við endan av 2017 hevði Føroya Tele ein marknaðarpart á 83%, meðan Hey hevði ein marknaðarpart á 17%.

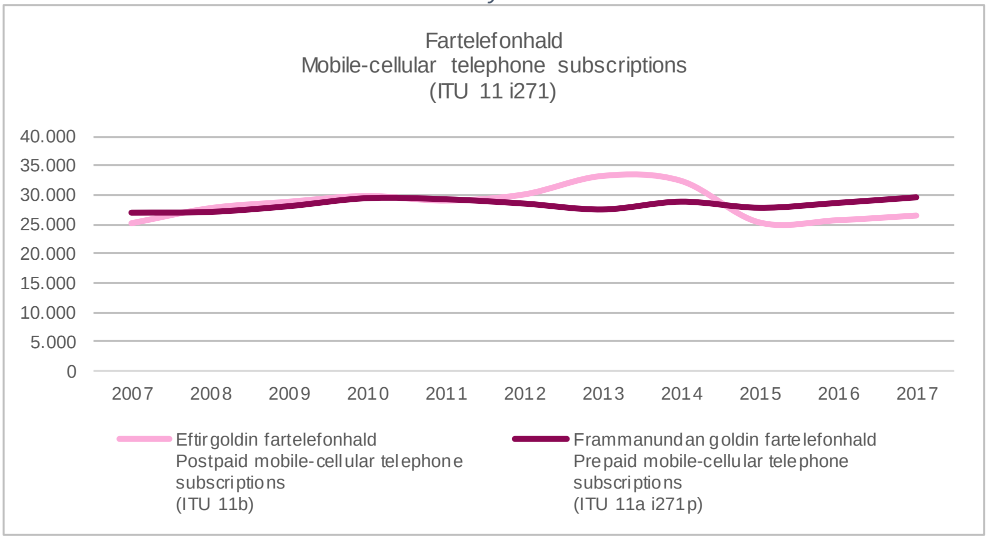
Fartelefoni

Talið av fartelefonhaldum hækkaði upp til 56.000 hald við endan av 2017. Hetta er líka omanfyri 3.000 hald fleiri, samanborið við ársenda 2015. Talið av bæði frammanundan- og eftirgoldnum haldum vaks í hesum tíðarskeiði.

Við ársenda 2017 vóru 53% av fartelefonhaldunum frammanundan goldin. Samlaða talið var nærum 30.000. Føroya Tele hevði 28.000 frammanundan goldin hald, svarandi til 95% av samlaðu frammanundan goldnu haldunum; ein vøkstur uppá 10% árliga. Hey hevði restina av frammanundan goldnu haldunum, svarandi til 5%. Orsøkin til stóra marknaðarpartin hjá Føroya Tele var, at ”ver” privatkundahaldini hjá Føroya Tele vóru frammanundan goldin, meðan tilsvarandi RED privatkundahaldini hjá Hey vóru eftirgoldin. Vinnulig hald vóru hinvegin vanliga eftirgoldin hjá báðum veitarum.

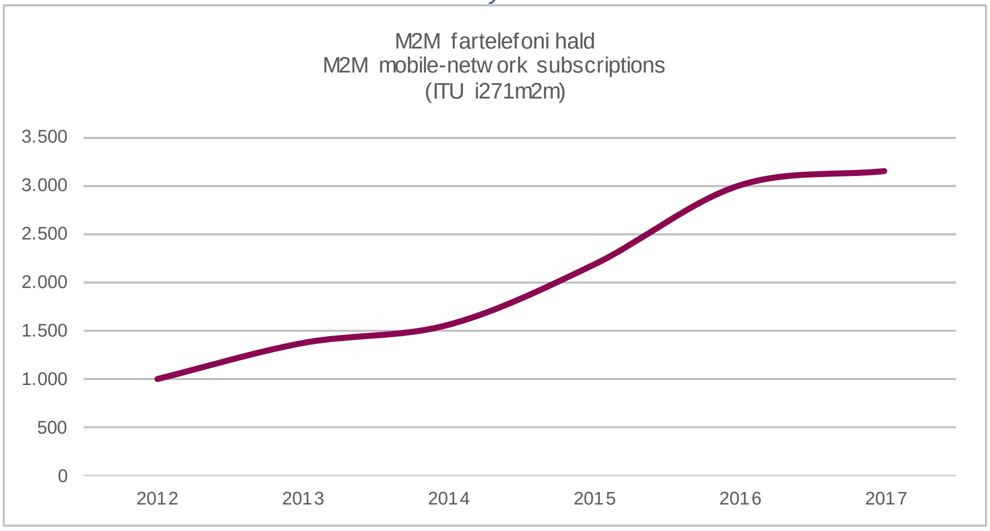
Við ársenda 2017 vóru meira enn 26.000 eftirgoldin hald. Talið av eftirgoldnum haldum hjá Hey vaks til 13.000 við endan av 2017, sum er knappliga 3.000 fleiri hald samanborið við árslok 2015. Við árslok 2017 høvdu Føroya Tele og Hey 50% hvør av marknaðinum fyri eftirgoldin hald.

Ritmynd 2



Talið av M2M haldum fór upp um 3.000 við endan av 2017, sum er ein árlig hækking við 20% samanborið við ársenda 2015. M2M hald fevna í høvuðsheitum um vinnulig hald, sum taldu 98% av haldunum við ársenda 2017. Føroya Tele hevði ein marknaðarpart á 73% av M2M haldunum, meðan Hey hevði tey eftirverandi 27%.

Ritmynd 3



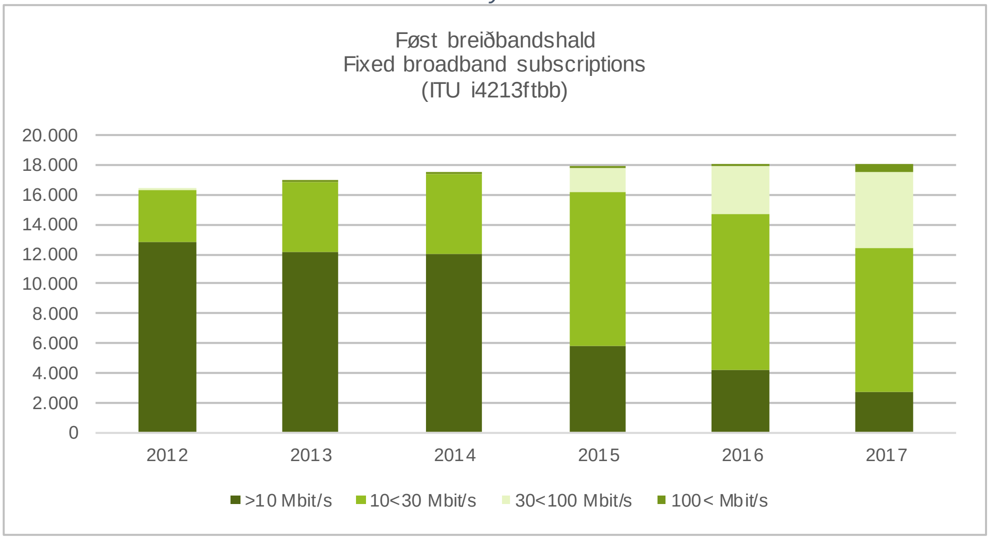
Internet

Tað vóru 18.000 føst breiðbandshald á føroyska fjarskiftismarknaðinum við ársenda 2017. Marknaðurin fevndi um tríggjar tøknir: DSL, ljósleiðari og FWA. Við einum marknaðarparti á 99%, var DSL framvegis tann mest vanliga tøknin í 2017.

Rákið við menning av skjótari breiðbandsferð helt fram. Frá endanum av 2015 til endan av 2017, minkaði talið av haldum við ferð undir 10 Mbit/s við 31% um árið, ímeðan talið av haldum við einari ferð á omanfyri 30 Mbit/s vaks við 92% um árið.

Við ársenda 2017 hevði Føroya Tele ein marknaðarpart á 77%, Hey hevði ein marknaðarpart á 22%, meðan Elektron og Nótin deildu tað seinasta 1%.

Ritmynd 4



Tað vóru 45.000 mobil breiðbandshald við ársenda 2017. Ein hækking við 6% samanborið við undanfarna árið. Av hesum høvdu 42.700 mobil breiðbandshald atgongd til bæði data- og taluferðslu. Um talið av mobilum talu- og datahaldum verður samanborið við samlaðu fartelefonhaldini sæst, at talu/data hald fevna um 76% av samlaðu fartelefonhaldunum.

Seinastu árini vóru mobila breiðbandskervið munandi víðkað og dagført við 4G tøkni. Hey tendraði fyrstu 4G støðirnar í juni 2015, meðan Føroya Tele tendraði sínar fyrstu 4G støðir í desember 2015. Síðani vóru kervini munandi útbygd, og við ársenda høvdu nærum øll búsett øki í Føroyum atgongd til bæði 3G og 4G.

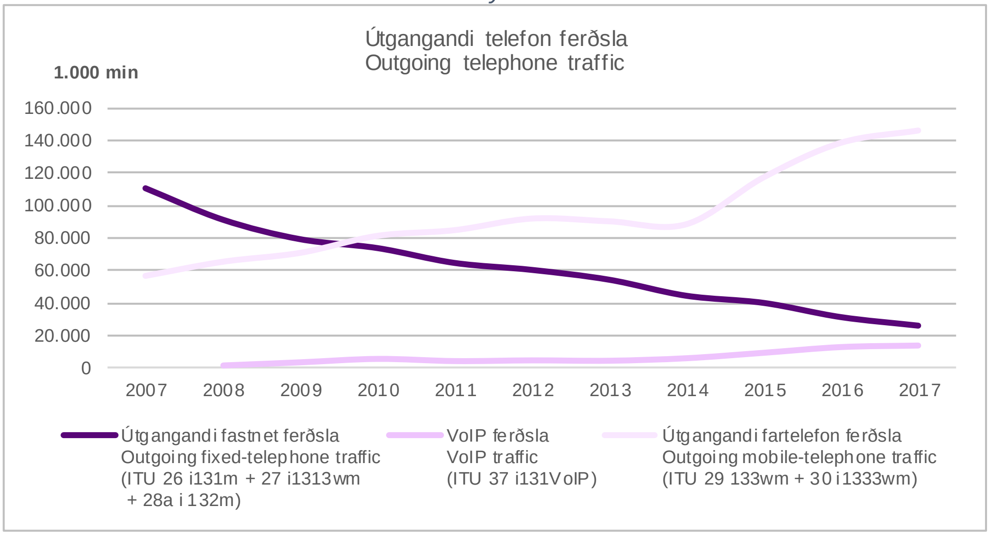
Ferðsla

Fastnet ferðsla
Útgangandi fastnettelefon ferðslan minkaði til 431.715 tímar í 2017. Samanborið við 2007, er ferðslan minkað 14% árliga. Útgangandi ferðslan minkaði til slakar 24 tímar fyri hvørt hald í 2017. Til samanbering var ferðslan í 2017 33 tímar pr. hald.

Samstundis sum talið av VoIP haldum vaks, øktist VoIP ferðslan til 236.254 tímar í 2017. Frá 2015 til 2017 hækkaði VoIP ferðslan við 22% árliga. Ferðslan fyri hvørt hald øktist við 8% til 105 tímar í 2017, samanborið við 90 tímar í 2015. Vinnulig hald taldu 99,8% av VoIP ferðsluni í 2017.

Fartelefon ferðsla
Útgangandi fartelefonferðsla hækkaði til 2.443.345 tímar í 2017, frá 1.962.762 tímum í 2015. Ferðslan fyri hvørt hald minkaði við 3% til 43 tímar í sama tíðarskeiði, hóast positivu gongdina í ferðsluni.

Ritmynd 5

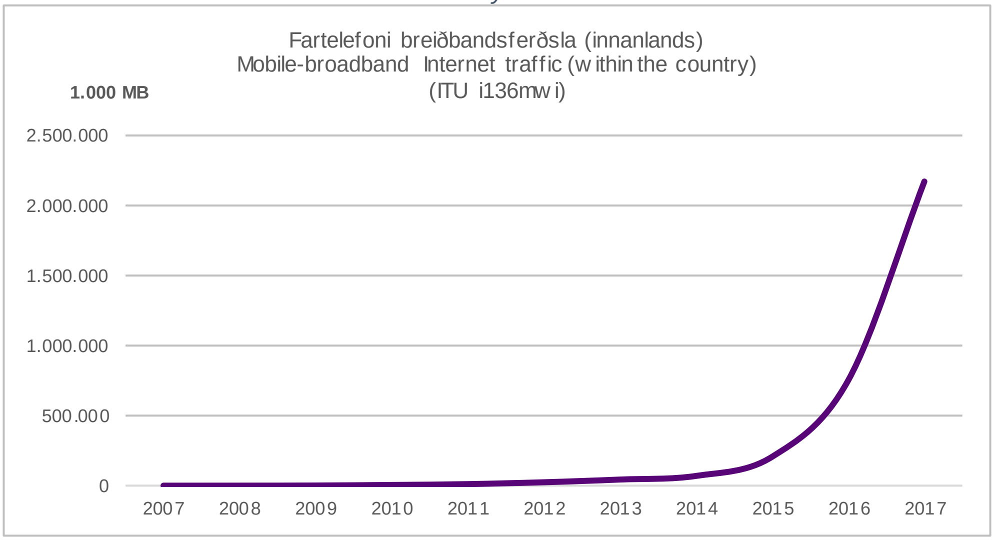


<u>Reiking</u>
Sammett við 2015 reikaðu føroyskir fartelefonhaldarar 29% fleiri minuttir uttanlands í 2017. Føroyskir haldarar reikaðu 185,598 tímar í leypi av 2017, sum svarar til 3,4 tímar fyri hvørt fartelefonhald. Hetta er ein væntað avleiðing av víðkanini av londum, fevnd av uttanlandspakkunum hjá fjarskiftisveitarunum.

Útlendingar reikaðu 36,297 tímar á føroysku farnetunum í 2017. Í mun til 2015 er hetta ein øking uppá 15%. Økingin er helst eitt úrslit av stóra vøkstrinum í talinum av ferðafólkum í Føroyum seinastu árini.

Internetferðsla
Nýtslan av dáta á mobilum breiðbandi helt fram við at vaksa í stórum. Í 2017 nýttu mobilu breiðbandshaldini 2,2 milliardir MB á føroysku netunum. Samanborið við nýtsluna í 2015, hevur talan verið um ein árligan vøkstur á 224%. Mobil hald við atgongd til bæði talu og data nýttu 1,8 milliardir MB í 2017. Tað svarar til 84% av samlaðu dátanøgdini sum var nýtt á mobilu breiðbandshaldunum. Restin av dátunýtsluni stavar frá dedikeraðum breiðbandshaldum.

Ritmynd 6



Sjóvnvarp

Tveir sjónvarpsvarparar eru fevndir av hagtølunum. Televarpið bjóðaði terrestriska sjónvarpssendingar, meðan Canal Digital bjóðaði DTH[2] fylgisveina sjónvarp.

Við endan av 2017 vóru 13.000 sjónvarpshald. 73% av haldunum vóru terrestrisk hald, meðan tey írestandi 27% vóru fylgisveina sjónvarpshald. Talið av sjónvarpshaldum hevur verið í minking síðan 2008. Henda gongdin helt fram í 2017, hóast samlaða talið av sjónvarpshaldum vaks. Sjónvarpshald hjá eigarafeløgum vóru nevniliga fyri fyrstu ferð fevnd av frágreiðingini frá Canal Digital frá 2017. Tí geva tølini eina skeiva ábending um vøkstur í sjónvarpshaldum. Hald hjá eigarafeløgum hjá Canal Digital taldu 1,062 við ársenda 2017. Um vit síggja burtur frá hesum haldunum, lækkaði talið av sjónvarpshaldum við 3,7% árliga frá ársenda 2015 til ársenda 2017.

Ritmynd 7

Highlights[3]

Fixed-telephone networks

18,021 subcriptions (-5.27%)

Of which 2,242 were VoIP hald (+12.90%) and 2,026 were ISDN voice-channel equivalents (-13.12%)

Mobile-cellular networks

56,293 subscirptions (+2.85%)

Of which 26,606 were postpaid subscriptions (+2.26%)

3,149 M2M mobile-network subsciprtions (+20.10%)

Internet

18,041 fixed broadband subscirptions (+0.70%)

Of which 17,844 were DSL internethald (+0.72%)

45,009 active mobile-braodband subscriptions (+5,99)

Traffic

16,807,100 min. outgoing mobile traffic to international (+17.95%)

14,175,220 min. VoIP traffic (+22.18%)

2.167.897.670 MB domestic mobile-broadband inetrnet traffic (+661,95%)

Broadcasting

13,017 multichannel TV subscriptions

Of which 3,513 were DTH satellite subscriptions

[3] The development stated refers to the annual growth compared to the same period or point in time two years prior. The number of subscriptions was stated by year-end. The amount of traffic was calculated for the whole year.

Summary

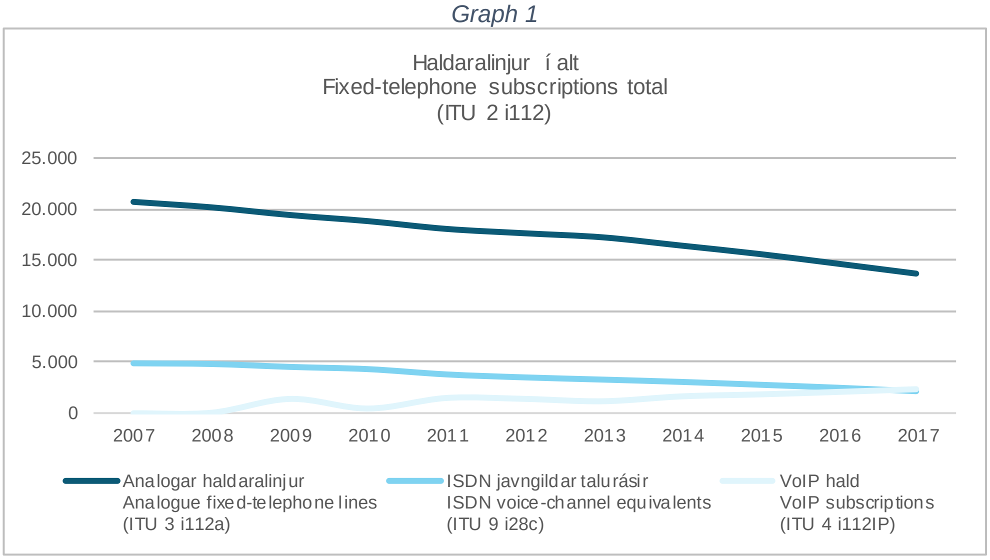
Fixed-telephone networks

There were 18 thousand fixed-telephone subscriptions by year-end 2017. A decrease of 2 thousand subscriptions compared to the end of 2015. Traditional fixed-telephone subscriptions (analogue and ISDN) continued to decrease, while the number of VoIP subscriptions increased.

Although traditional analogue telephone subscriptions counted 92% of the decrease, this technology remained the most common on the Faroes fixed-telephone market. By year-end 2017, analogue lines counted 76% of the fixed-telephone subscriptions.

VoIP counted 2.2 thousand subscriptions by the end of 2017, nearly 500 subscriptions more than by year-end 2015. By the end of 2017, VoIP counted 12% of all fixed-telephone subscriptions, compared to 9% at the end of 2015. VoIP mainly consisted of business subscriptions, which counted 98% of total subscriptions by year-end 2017.

Graph 1



The breakdown of fixed-telephone market shares has not developed significantly during the period. By end of 2017, Føroya Tele held an 83% market share, while Hey held the remaining 17%.

Mobile-cellular networks

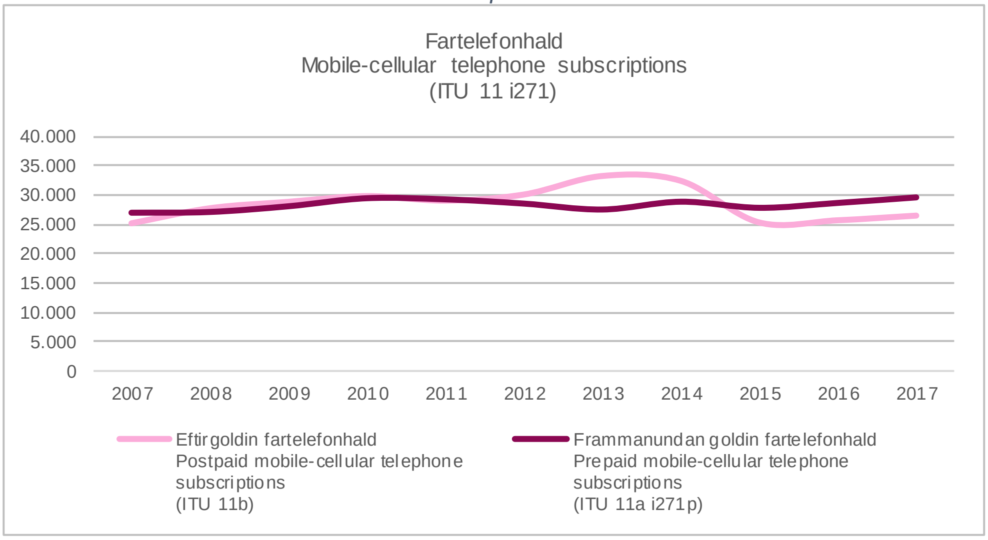
Mobile-telephone subscriptions increased to 56 thousand by year-end 2017. Just above 3 thousand subscriptions more compared to year-end 2015. Both pre- and post-paid subscriptions increased during this period.

At the end of 2017, pre-paid subscriptions counted 53% of the mobile-telephone subscriptions. Nearly 30 thousand subscriptions in total. Føroya Tele counted 28 thousand pre-paid subscriptions. Equal to a market share of 95%, an increase of 10% yearly compared to year-end 2015. Hey held the remaining market share of 5%.

At year-end 2017, the number of post-paid subscriptions was above 26,000. Compared to year-end 2015 Hey increased their number of post-paid subscriptions by slightly 3,000 to 13,000. Hence, Hey and Føroya Tele held 50% market share each.

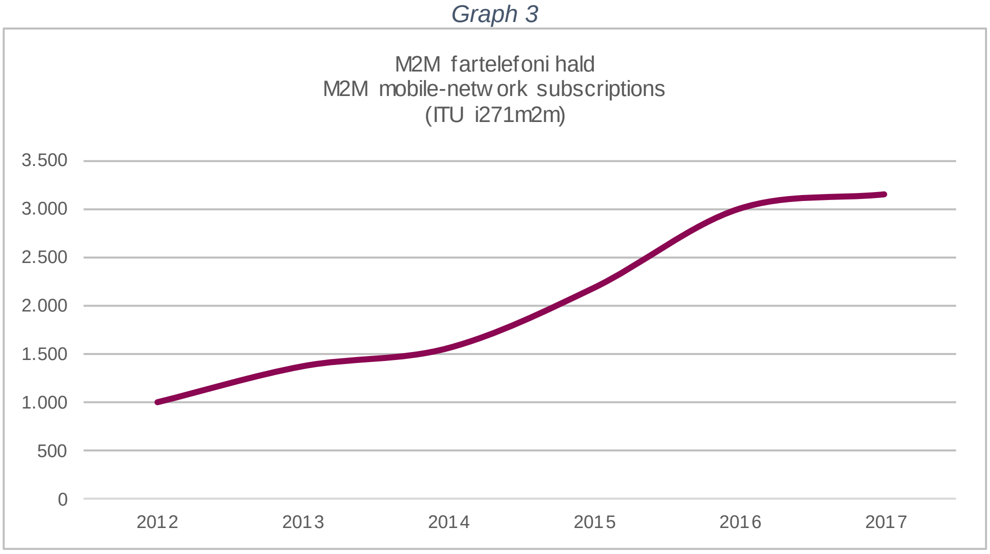
Føroya Tele's very dominant market share in the prepaid market was due to their product series "*ver*" for private mobile-telephone subscribers being pre-paid subscriptions. Hey's corresponding series "RED" was post-paid subscriptions. Business subscriptions were primarily post-paid subscriptions at both operators.

Graph 2



The number of M2M subscriptions surpassed 3 thousand by the end of 2017, a yearly increase of 20% compared to the end of 2015. M2M subscriptions mainly consisted of business subscriptions, counting 98% of the total subscriptions by year-end 2017. At this time, Føroya Tele held a market share of 73% of the M2M subscriptions, while Hey held the remaining 27%.

Graph 3



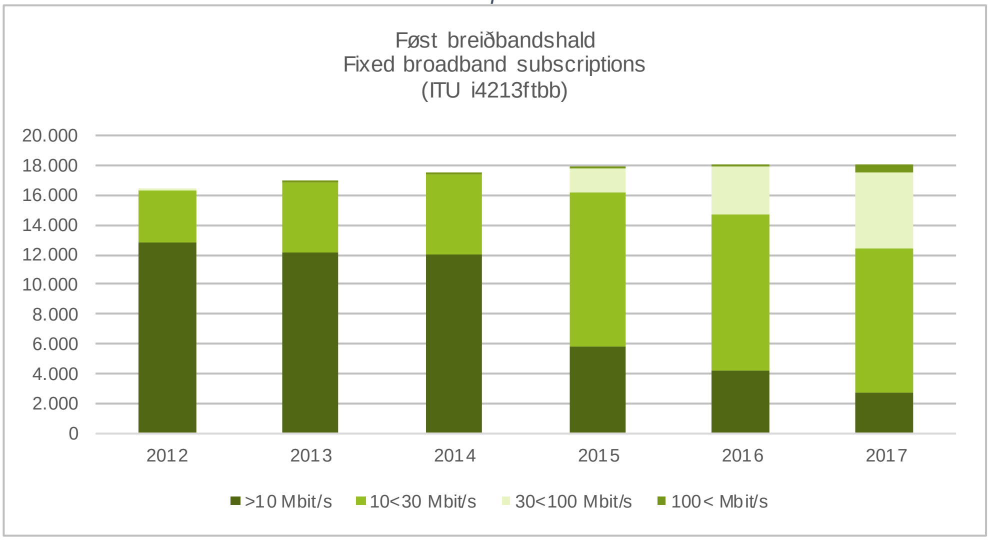
Internet

The Faroese telecom market counted 18 thousand fixed broadband subscriptions by the end of 2017. The Faroese fixed-broadband market consisted of three technologies: DSL, fibre and FWA. With a market share of 99%, DSL continued to be the most common at year-end 2017.

The tendency to upgrade to a higher speed broadband continued. While subscriptions with at speed below 10 Mbit/s decreased 31% a year, subscriptions with a speed above 30 Mbit/s increased 92% yearly, from the end of 2015 to the end of 2017.

At year-end 2017, Føroya Tele held a market share of 77%, Hey held 22% market share, while Electron and Nótin shared the last 1%.

Graph 4



There were 45 thousand mobile broadband subscriptions by year-end 2017. An increase of 6% compared to one year previous. Hereof, 42.7 thousand mobile broadband subscriptions had access to both data and voice traffic. Comparing the number of mobile voice&data subscriptions to the number of mobile-telephone subscriptions, we find voice&data subscriptions counts 76% of the total number of mobile-telephone subscriptions.

Throughout the past few years, the mobile-broadband networks have undergone major expansions and upgrading. The operators both launched 4G networks during 2015. Hey launched their network in June, while Føroya Tele launched their network in December. At year-end 2017, roughly 100% of the populated areas were covered with both a 3G and 4G network.

Traffic

Fixed traffic

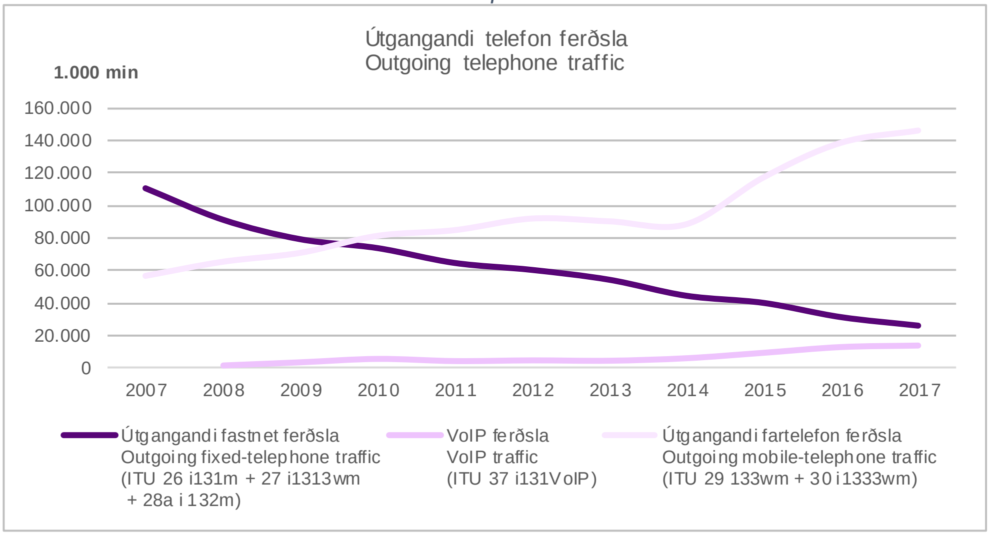
Outgoing fixed-telephone traffic decreased to 431,715 hours in 2017. A yearly decrease of 14% compared to the traffic in 2007. The outgoing traffic decreased to below 24 hours per subscription in 2017.

As the number of VoIP subscriptions increased, the VoIP traffic grew to 236.254 hours in 2017. From 2015 to 2017, VoIP traffic increased by 22%. Traffic per subscription grew 8% to 105 hours in 2017, compared to 90 hours in 2015. Business subscriptions counted 99.8% of the VoIP traffic in 2017.

Mobile traffic

Outgoing mobile-telephone traffic increased to 2,443,345 hours in 2017, from 1,962,762 hours in 2015. Traffic per subscription decreased 3% to 43 hours during the same period, despite the positive development in traffic.

Graph 5

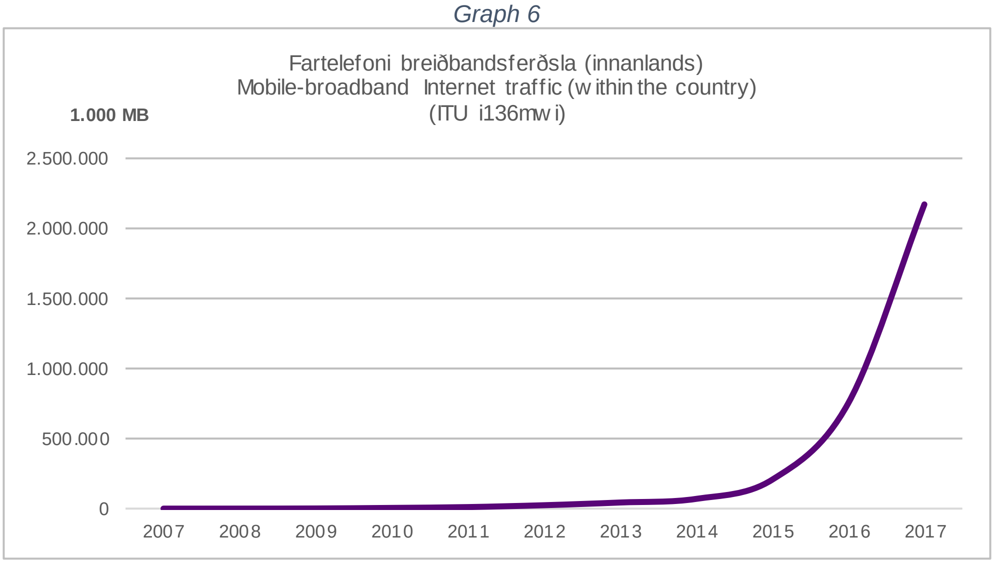


<u>Roaming</u>
The amount of traffic Faroese subscribers used while overseas (outbound roaming) increased 29% from 2015 to 2017. Faroese subscribers roamed 185,598 hours during 2017, equal to 3.4 hours per mobile-telephone subscription. This development was expected as the number of countries included in the operator's "roam-like-home" packages has been expanded considerably.

Foreigners' data consumption on the Faroese mobile networks (inbound roaming) simultaneously increased 15%. During 2017, foreigners consumed 36,297 hours on the Faroese networks. The increase in inbound roaming is probably due to the very positive development in the number of tourists, visiting the Faroe Islands.

Internet traffic
The consumption of mobile-broadband continued to increase enormously. During 2017, mobile-broadband subscriptions consumed 2.2 billion MB on the Faroese networks, compared to the consumption of 206 million MB in 2015. This was a yearly increase of 224%, mainly due to the introduction of 4G in 2015 and correspondingly lower prices pr. GB. Mobile subscriptions with access to both voice and data consumed 1.8 billion MB in 2017, counting 84% of the total mobile broadband consumption.

Graph 6



Broadcasting

Two television broadcasters have been included in the statistics. Televarpið offered terrestrial broadcasting, while Canal Digital offered DTH satellite television.

By the end of 2017, TV subscriptions counted 13 thousand. At this time, terrestrial subscriptions counted 73%, while the remaining 27% were satellite TV subscriptions. The number of TV subscriptions has decreased since year-end 2008. This development continued in 2017, although the data from 2017 showed an increase in TV subscriptions. TV subscriptions by home associations were included in the statement from Canal Digital from 2017, giving a false indication of growth in TV subscriptions. Subscriptions by home associations at Canal Digital counted 1,062 subscriptions by year-end 2017. If we set aside these subscriptions, the number of TV subscriptions decreased 3.7% yearly from year-end 2015 to year-end 2017.

[5] Við tað at vit bert hava ein veitara av fastneti, verða fastnet nummur í Føroyum flutt millum veitararnar við at broyta veitaraforval. Broytingar í veitaraforvali koma fyri tá kundar skifta veitara, tá ein kundi stovnar hald og samstundis velur veitaraforval, og tá kundi sum hevur veitaraforval strikar haldið. Tað hevur ikki verið møguligt at uppgera flytingarnar serstakt, og tí vísir talið fleiri "porteringar" enn rætt er.

Since there is only one provider of the physical fixed network, fixed numbers are ported by changing the carrier pre-selection prefix. However, it has not been possible to screen out transferred numbers only. Hence, this figure contains transferred numbers as well as new or terminated numbers.

Tað skal viðmerkjast, at portering av nummarblokkum er íroknað. Tískil fevna hagtølini eisini um nummur, sum p.t. ikki eru í nýtslu.
It should be noted, that ported number-blocks are included. Therefore, the figure also includes numbers not in use at the moment.
