⁵ Við tað at vit bert hava ein veitara av fastneti, verða fastnet nummur í Føroyum flutt millum veitararnar við at broyta veitaraforval. Broytingar í veitaraforvali koma fyrri tá kundar skifta veitara, tá ein kundi stovnar hald og samstundis velur veitaraforval, og tá kundi sum hevur veitaraforval strikar haldið. Tað hevur ikki verið møguligt at uppgera flytingarnar serstakt, og tí vísir talið fleiri "porteringar" enn rætt er.

Since there is only one provider of the physical fixed network, fixed numbers are ported by changing the carrier pre-selection prefix. However, it has not been possible to screen out transferred numbers only. Hence, this figure contains transferred numbers as well as new or terminated numbers.

⁸ Bólkingin av fastnet breiðbandshaldum er tillagað, til tess at samsvara við ITU-leiðreglur. Hesar tillagingar hava havt við sær broyting í, hvussu hald blíva bólkað í mun til breiðbandsferð. Í fyrsta lagið var bólkingin av DSL haldum tillagað frá fyrstu hálvu av 2015. Bólkingin "Ferð yvir 2 Mbit/s til og við 10 Mbit/s" varð broytt til "2 Mbit/s upp til men undir 10 Mbit/s", sum elvdi til at eitt 10 Mbit/s hald ikki longur var partur av hesi bólkingini, eins og tað var frammanundan. Tískil vóru øll 10 Mbit/s hald flutt "ein bólkað upp" til bólkin "10 Mbit/s ella hægri", sum fyrr æt "Ferð yvir 10 Mbit/s". Á sama hátt vóru øll 2 Mbit/s hald flutt "ein bólkað upp", so tey nú eru í bólkinum "2 Mbit/s upp til men undir 10 Mbit/s". Hartil vóru øll hald við 10 Mbit/s ella hægri ferð bólkað meira nágreiniliga í undirbólkar. Í øðrum lagi varð greiningin av ljósleiðara haldum eftir ferð tillagað í fyrstu hálvu av 2016, so greiningin nú svarar til greiningina sum er nýtt fyri DSL, jb. omanfyri. Loksins varð greiningin av FWA haldum tillagað í seinnu hálvu av 2016, so hesi nú eisini eru greinað samsvarandi DSL og ljósleiðara.

The grouping of fixed-broadband subscriptions has been adjusted in order to comply with the ITU guidelines. These adjustments have resulted in a shift in how subscriptions are grouped by speed. First, the grouping of DSL subscriptions was adjusted from first half of 2015. The grouping "Speed above 2 Mbit/s but less than 10 Mbit/s" was changed to "2 Mbit/s to less than 10 Mbit/s", causing a 10Mbit/s subscription no longer to be included in this group as it would have been previously. Therefore, all 10 Mbit/s subscriptions was moved one level up to a new group: "10 Mbit/s and above". Similarly, all 2 Mbit/s subscriptions was moved up one level and included into the "2 Mbit/s to less than 10 Mbit/s" group. Furthermore, subscriptions with speed of 10 Mbit/s or more were detailed into sub-groups. Secondly, fibre subscriptions were adjusted in first half of 2016 so the new grouping corresponds to the DSL-grouping described above. Finally, the grouping of FWA subscriptions was adjusted to correspond to the DSL and fibre grouping in second half of 2016.
