Preface

The Telecommunication Authority publishes telecommunication statistics twice a year.

The purpose of this publication is to give the reader an insight into the latest development on the Faroese telecommunication market. This publication presents the developments of subscriptions and associated traffic within the key areas: Fixed-telephone networks, mobile-cellular networks, broadband and television broadcasting.

This publication is based on information collected by the Telecommunication Authority, an independent Government agency, from the operators on the Faroese telecommunication markets. The operators included in the statistics are: Føroya Tele (Faroese Telecom), Nema (previously called Hey / Vodafone), Canal Digital, Elektron, Tosa and Nótin.

Early in 2021 the Telecommunication Authority was informed that Nótin was declaring bankruptcy. It has not been possible to gather statistical data from Nótin for the year 2020. The information regarding Nótin for 2020 is therefore an estimate made by the Telecommunication Authority.

In December 2020 a new operator Tosa launched their line of mobile products to the Faroese market. Tosas core products are aimed at private consumers.

In January 2019 the operations of P/F Hey (prev. P/F Kall) moved to P/F Nema, after which the operator Hey changed name to Nema. P/F Hey since changes name to P/F 20.11.19 and are today the parent company of P/F Nema. The owners of P/F 20.11.19 are respectively Sp/f Hjallur (51,1 pct) and islandic Sýn HF (49,1 pct). Hjallur is a 100 pct subsidiary of P/F Tjaldur.

Indicators in this publication are in accordance with the standards of the International Telecommunication Union (ITU).

Modifications and corrections, made in 2017 and 2018, have been stated in the previous reports.

⁴ Við tað at vit bert hava ein veitara av fastneti, verða fastnet nummur í Føroyum flutt millum veitararnar við at broyta veitararforval. Broytingar í veitararforvali koma fyrri tá kundar skifta veitara, tá ein kundi stovnar hald og samstundis velur veitararforval, og tá kundi sum hevur veitararforval strikar haldið. Tað hevur ikki verið møguligt at uppgera flytingarnar serstakt, og tí vísir talið fleiri “porteringar” enn rætt er.

Tað skal viðmerkjast, at portering av nummarblokkum er íroknað. Tískil fevna hagtølini eisini um nummur, sum p.t. ikki eru í nýtslu.

Since there is only one provider of the physical fixed network, fixed numbers are ported by changing the carrier pre-selection prefix. However, it has not been possible to screen out transferred numbers only. Hence, this figure contains transferred numbers as well as new or terminated numbers.

It should be noted, that ported number-blocks are included. Therefore, the figure also includes numbers not in use at the moment.
