FJARSKIFTISHAGTØL TELECOM STATISTICS

1. útgáva, dagförd tann 13. september 2023
1st edition, updated on 13 september 2023

Formæli

Fjarskiftiseftirlitið kunngerð fjarskiftishagtøl tvær ferðir um árið.

Endamálið er at geva lesaranum innlit í seinastu gongdina á føroyska fjarskiftismarknaðinum. Talan er um lýsing av gongdini í haldum og tilhoyrandi ferðslu innan hesi lyklaøkir: fastnettelefoni, fartelefoni, breiðband og sjónvarp.

Hendan frágreiðingin er grundað á upplýsingar, sum Fjarskiftiseftirlitið hevur savnað frá veitarum á føroyska fjarskiftismarknaðunum. Veitararnir, sum eru fevndir av hagtølunum, eru: Føroya Tele, Nema, Canal Digital, Elektron, Glotti, Tosa og Nótin.

Tíðliga í 2021 gjørðist greitt, at televeitarin Nótin varð tикиn upp sum trotabúgv, og tí hevur ikki verið gjørligt at fáa hagtøl fyri 2020, og hevur Fjarskiftiseftirlitið grundað hagtølini hjá Nótini á egnar metingar.

Tosa, sum er ein nýggjur fartelefoniveitari, byrjaði virksemi 3. desember 2020. Tosa er, sum tann fyrsti í Føroyum, ein sokallaður virtuellur veitari (MVNO). Hetta merkir, at Tosa leigar seg inn á farkervið hjá einum øðrum veitara. Tosa vendir sær fyrst og fremst til privatmarknaðin.

Tosa eru í 2022 uppgjørt sum trotabúgv. Tískil hevur ikki veri möguligt at savna hagtøl frá Tosa fyri seinna hálvår 2021.

Av tí at Tosa byrjaði sítt virksemi seint i 2020, og dátur frá seinnu helvt av 2021 ikki eru tøkar, eru 2020 og 2021 ikki samanberandi. Ársvøksturin 2020-2021 fyri Tosa er tískil ikki tiki við i hesa útgávu.

Í 2021 var Glotti lagt aftrat útgávuni. Glotti byrjaði aftur í 2021, eftir 4 ár í dvala. Glotti veitur privat kundum í parti av Eysturoynni fast breiðband umvegis kaðal, ljósleiðara og FWA¹.

Indikatorarnir í hesi útgávuni eru uppgjørdir í samsvari við standardir hjá altjóða fjarskiftissambandinum: "International Telecommunication Union" (ITU).

Preface

The Telecommunication Authority publishes telecommunication statistics twice a year.

The purpose of this publication is to give the reader an insight into the latest development on the Faroese telecommunication market. This publication presents the developments of subscriptions and associated traffic within the following key areas: Fixed-telephone networks, mobile-cellular networks, broadband and television broadcasting.

This publication is based on information collected by the Telecommunication Authority, an independent Government agency, from the operators on the Faroese telecommunication markets. The operators included in the statistics are: Føroya Tele (Faroese Telecom), Nema (previously called Hey / Vodafone), Canal Digital, Elektron, Glotti, Tosa and Nótin.

Early in 2021 the Telecommunication Authority was informed that Nótin was declaring bankruptcy. It has not been possible to gather statistical data from Nótin for the year 2020. The information regarding Nótin for 2020 is therefore an estimate made by the Telecommunication Authority.

In December 2020 a new operator Tosa launched their line of mobile products to the Faroese market. Tosa is the first virtual operator (MVNO) on the Faroes market. Tosas core products are aimed at private consumers.

Tosa declared bankruptcy in 2022. It has therefore not been possible to gather statistics from Tosa for 2nd half of 2021. Since Tosa launched in late 2020 and data for 2nd half of 2021 has not been submitted, the calculation of the annual growth 2020-2021 would be misleading, and has therefore not been included in this publication.

In 2021 Glotti was added to the statistics. Glotti resurfaced in 2021 after 4 years dormancy. Glotti provides fixed-broadband over cable, fibre and FWA² to private consumers in parts of Eysturoy.

Indicators in this publication are in accordance with the standards of the International Telecommunication Union (ITU).

⁵ Við tað at vit bert hava ein veitara av fastneti, verða fastnet nummur í Føroyum flutt millum veitaramnar við at broyta veitaraforval. Broytingar í veitaraforvali koma fyri tá kundar skifta veitara, tá ein kundi stovnar hald og samstundis velur veitaraforval, og tá kundi sum hevur veitaraforval strikar haldið. Tað hevur ikki verið möguligt at uppgera flyingarnar serstakt, og tí víslir talið fleiri "porteringar" enn rætt er.

Tað skal viðmerkjast, at portering av nummarblokkum er íroknað. Tískil fevna hagtölini eisini um nummur, sum p.t. ikki eru í nýtslu.

Since there is only one provider of the physical fixed network, fixed numbers are ported by changing the carrier pre-selection prefix. However, it has not been possible to screen out transferred numbers only. Hence, this figure contains transferred numbers as well as new or terminated numbers.

It should be noted, that ported number-blocks are included. Therefore, the figure also includes numbers not in use at the moment.
