¹⁴ At eitt nummar er flutt merkir, at kundin hevur flutt sítt nummar frá einum veitara til ein annan.

¹⁵ To port a number signifies that a customer has switched service provider, transferring the number from one provider to another.

¹⁶ Við tað at vit bert hava ein veitara av fastneti, verða fastnetnummur í Føroyum flutt millum veitarnar við at broyta veitaraforval. Broytingar í veitaraforvali koma fyrri, tá ið kundar skifta veitara, tá ið ein kundi stovnar hald og samstundis velur veitaraforval, og tá ið kundi, sum hevur veitaraforval, strikar haldið. Tað hevur ikki verið møguligt at gera flutningarnar upp serstakliga, og tí vísir talið fleiri porteringar enn rætt er.

Tað skal viðmerkjast, at portering av nummarblokkum er íroknað. Tískil fevna hagtølini eisini um nummur, sum í lètuni ikki eru í nýtlu.

¹⁷ Since there is only one provider of the physical fixed network, fixed numbers are ported by changing the carrier pre-selection prefix. However, it has not been possible to screen out transferred numbers only. Hence, this figure contains transferred numbers as well as new or terminated numbers.

It should be noted, that ported number blocks are included. Therefore, the figure also includes numbers not in use at the moment.
