Formæli

Fjarskiftiseftirlitið kunnger fjarskiftishagtøl tvær ferðir um árið.

Endamálið er at geva lesaranum innlit í seinastu gongdina á føroyska fjarskiftismarknaðinum. Talan er um lýsing av gongdini í høldum og tilhoyrandi ferðslu á hesum lyklaøkjum: fastaneti, fartelefonneti, breiðbandi og sjónvarpi.

Henda frágreiðingin er grundað á upplýsingar, sum Fjarskiftiseftirlitið hevur savnað frá veitarum á føroyska fjarskiftismarknaðunum. Veitararnir, sum eru fevndir av hagtølunum, eru: Føroya Tele, Nema, Canal Digital, Elektron og Glotti.

Í 2021 var Glotti lagdur aftur at útgávuni. Glotti byrjaði aftur í 2021 eftir 4 ár í dvala. Glotti veitir privatkundum í parti av Eysturoynni fast breiðband um kaðal, ljósleiðara og FWA[1].

Broyting í ár er, at áður hevur verið biðið um *megabýt eftir tvítalsskipan*, sum tøkniliga verður kallað *mebibýt*, meðan nú verður biðið um at fáa eftir *tíggjutalsskipan*. Henda skilmarkan kemur frá IEC 60027-2. Sí dømi í fótnotu[2].

Ábendingarnar í hesi útgávuni eru gjørdar upp í samsvari við mát Altjóða fjarskiftissambandsins[3].

Preface

The Telecommunication Authority publishes telecommunication statistics twice a year.

The purpose of this publication is to give the reader insight into the latest developments in the Faroese telecommunication market. This publication presents the developments of subscriptions and associated traffic within the following key areas: Fixed-telephone networks, mobile-cellular networks, broadband, and television broadcasting.

This publication is based on information collected by the Telecommunication Authority, an independent Government agency, from the operators on the Faroese telecommunication markets. The operators included in the statistics are: Føroya Tele (Faroese Telecom), Nema (previously called Hey / Vodafone), Canal Digital, Elektron, and Glotti.

In 2021, Glotti was added to the statistics. Glotti resurfaced in 2021 after 4 years in dormancy. Glotti provides fixed-broadband over cable, fibre and FWA[4] to private consumers in parts of Eysturoy.

A change this year is that previously, requests were made for megabytes based on the *binary system*, which technically are called *mebibytes*, whereas now the request was for the *decimal system*. This definition comes from IEC 60027-2. Please see example in footnote[5].

Indicators in this publication are in accordance with the standards of the International Telecommunication Union (ITU).

Please note that this document uses Continental European formatting for numbers: commas (,) as decimal points and periods (.) as thousands separators, except in the Highlights section.

[4] Terrestrial fixed wireless broadband.

[5] Decimal system: 1,000,000 bytes are 1,000 kilobytes (kB) or 1 megabyte (MB).
Binary system: 1,000,000 bytes are 976.5625 kibibytes (KiB) or 0.95367431640625 mebibytes (MiB).

megabyte = 1000^2 bytes.
mebibyte = 1024^2 bytes.

Thus, a mebibyte is approximately 95.4% of a megabyte.

[10] At eitt nummar er flutt merkir, at viðskiftin hevur skift veitara og tí hevur flutt sítt nummar frá einum veitara til ein annan.

[11] To port a number signifies that a customer has switched service provider, transferring the number from one provider to another.

[12] Við tað at vit bert hava ein veitara av fastneti, verða fastnetnummur í Føroyum flutt millum veitararnar við at broyta veitaraforval. Broytingar í veitaraforvali koma fyri, tá ið viðskiftar skifta veitara, tá ið ein viðskifti stovnar hald og samstundis velur veitaraforval, og tá ið viðskifti, sum hevur veitaraforval, strikar haldið. Tað hevur ikki verið møguligt at gera flutningarnar upp serstakliga, og tí vísir talið fleiri flutningar enn rætt er.

Tað skal viðmerkjast, at flutningur av nummarblokkum er íroknaður. Tískil fevna hagtølini eisini um nummur, sum í løtuni ikki eru í nýtslu.

[13] Since there is only one provider of the physical fixed network, fixed numbers are ported by changing the carrier pre-selection prefix. However, it has not been possible to screen out transferred numbers only. Hence, this figure contains transferred numbers as well as new or terminated numbers.

It should be noted, that ported number blocks are included. Therefore, the figure also includes numbers not in use at the moment.
